

MSc. Solar Energy Engineering

Albert-Ludwigs-Universität Freiburg

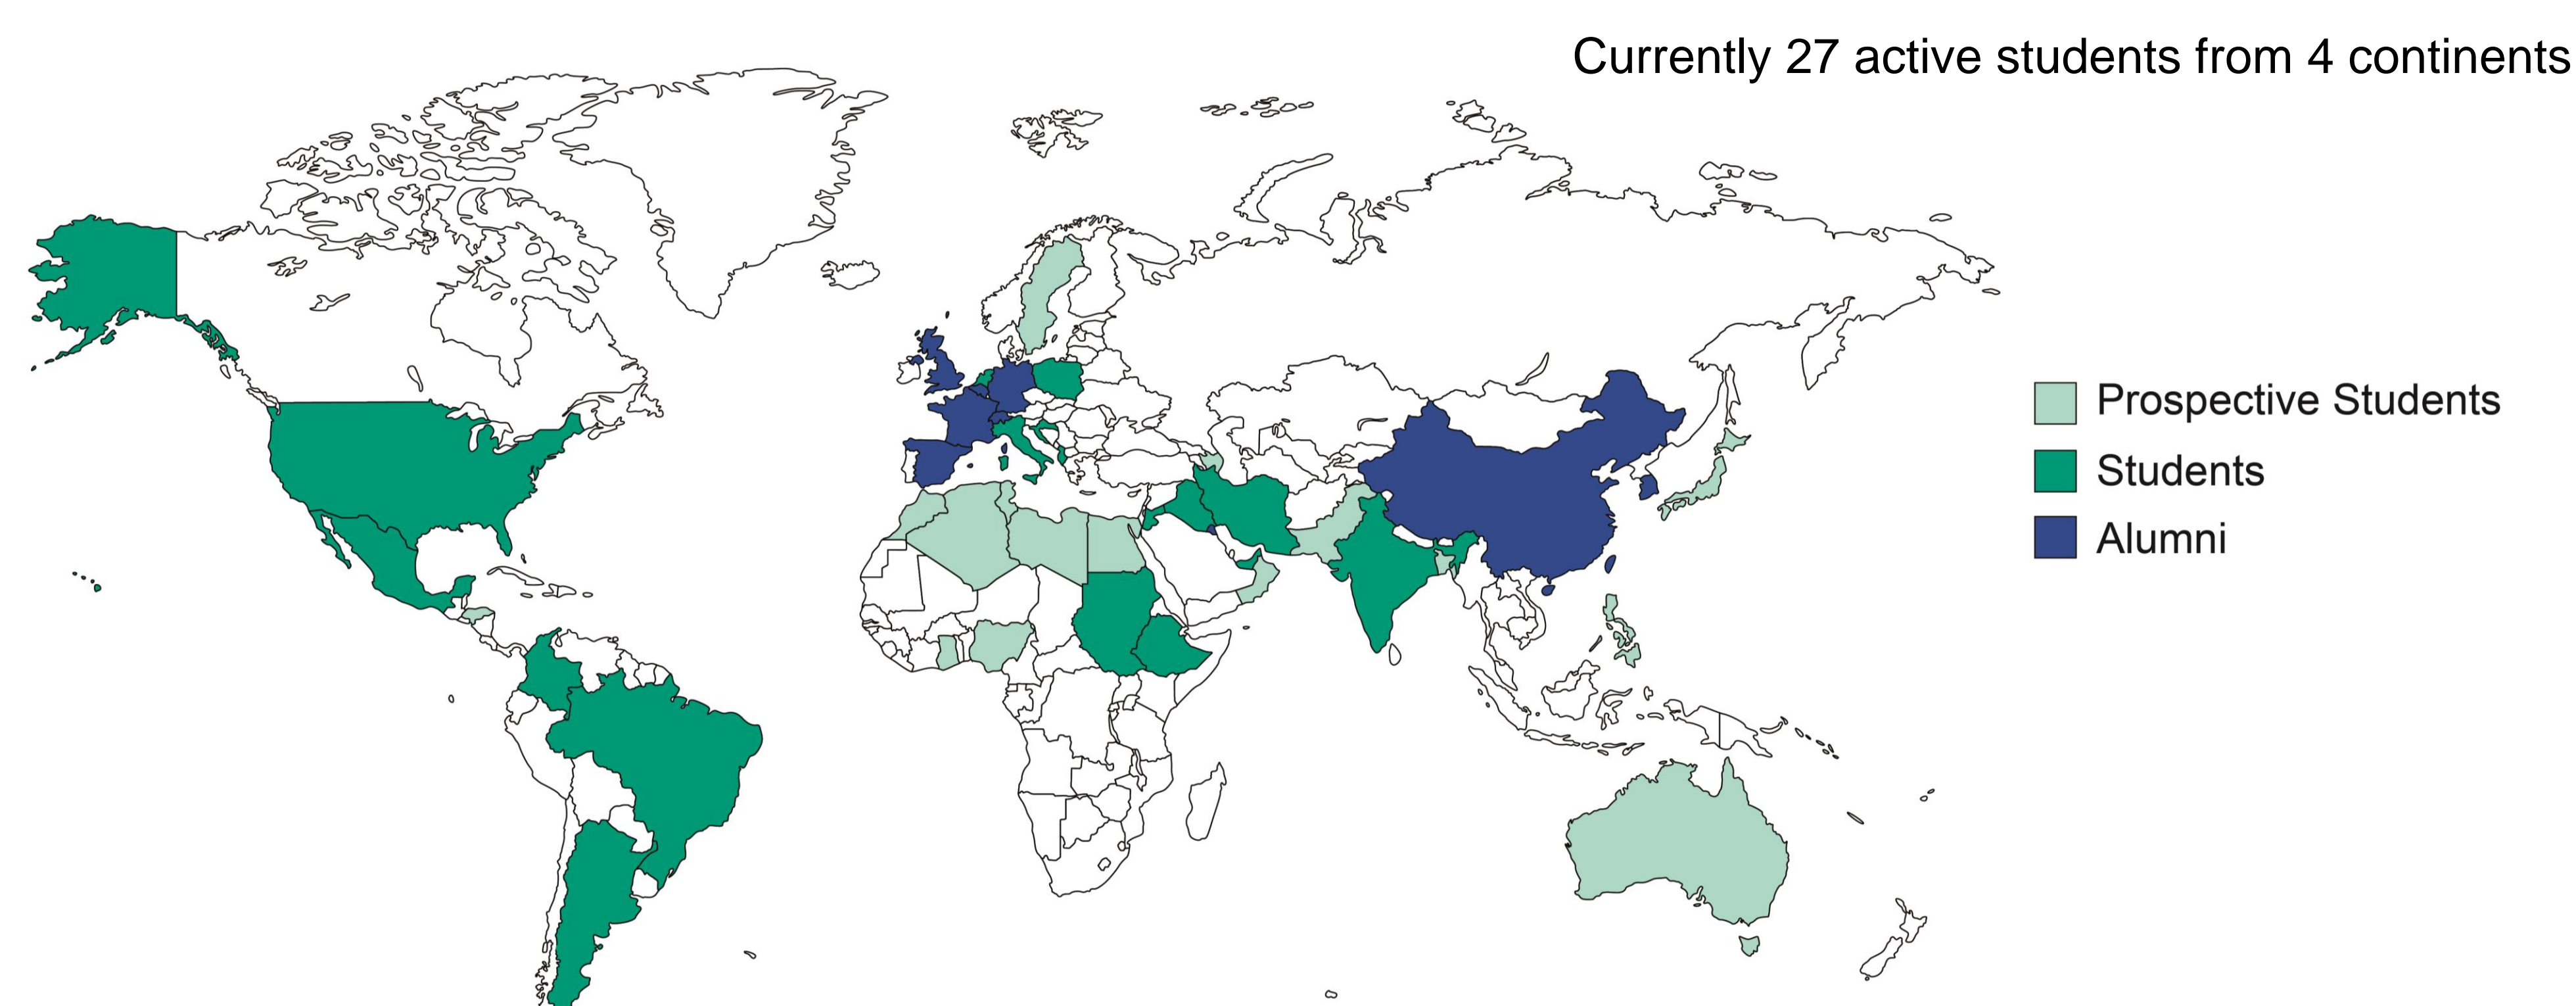

UNI
FREIBURG

Studying Online & Part Time – From all Around the World

The Online Master in „Solar Energy Engineering“ is an international, part time and distance learning program. It is offered by the University of Freiburg in scientific cooperation with the Fraunhofer Institute for Solar Energy Systems. In a flexible online learning environment, we offer comprehensive courses to students from all around the world. Exams are being hold in centers near the students' current residencies. Twice a year, the Campus Phases in Freiburg are a great opportunity to meet fellows and to join hands-on lab trainings.

Online Continuing Education: A chance to open up the University to the World

Learning everything about solar energy research, development and production from the best German solar experts.

Structure of the Program: An innovative didactical teaching approach

The students become part of an active and diverse group. They learn to cooperate online in global teams.

Study Online – From Everywhere in the world

- E-Lectures
- Videos
- Access to the library
